FENTINOVA

LIFESTYLE

Fentinova Lifestyle is a wholesaler of bathrooms. We are partners with a factory in Turkey. Therefore we are able to customize products in different sizes and colours.

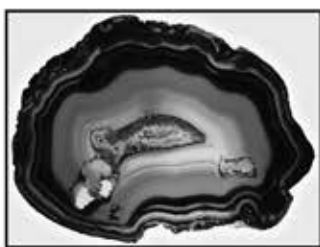

In fabricated manufacturing process, integration of high technology manufacturing and handmade manufacturing systems in a closed area of 7.000 m² is considered to be basis.

Use of entirely natural materials in all products manufactured with an understanding considering people and nature as the basis carries great significance for the brand.

Natural wooden veneer is used in bathroom furniture, and precious stones brought from different locations of the world are used in sinks.

“Exclusive” bathroom cabinets and washbasins are manufactured both for domestic and foreign markets.

All our products conform to the highest quality standards. The cabinets are equipped with the well-known BLUM softclose systems. And our washbasins are handmade with solid surface minerals.
